

Exercise

- Solve the dual problem to the Farmer's problem with selling of land and only wheat and rye

Exercise

By means of MatLab:

Maximize $x_1 + x_2$ subject to the constraints $x_j \geq 0$ for all j and

$$x_1 + 2x_2 \leq 4$$

$$4x_1 + 2x_2 \leq 12$$

$$-x_1 + x_2 \leq 1$$

Formulate and solve the dual problem
